Ellington Financial Inc. Reports First Quarter 2021 Results

OLD GREENWICH, Connecticut—May 5, 2021

Ellington Financial Inc. (NYSE: EFC) (the "Company") today reported financial results for the quarter ended March 31, 2021.

Highlights

- Net income of \$37.9 million, or \$0.86 per common share.
- Core Earnings¹ of \$18.8 million, or \$0.43 per share.
- Book value per common share as of March 31, 2021 of \$18.16, including the effects of dividends of \$0.30 per common share for the quarter.
- Credit strategy gross income of \$50.7 million for the quarter, or \$1.14 per share.
- Agency strategy gross income of \$40 thousand for the quarter.
- Dividend yield of 9.4% based on the May 4, 2021 closing stock price of \$17.80 per share, and dividend of \$0.14 per common share declared on April 4, 2021, which was an increase of 40% compared to the previous dividend amount.
- Debt-to-equity ratio of 3.1:1 and recourse debt-to-equity ratio of 2.0:1² as of March 31, 2021. Adjusted for unsettled purchases and sales, these ratios were 3.2:1 and 2.0:1, respectively as of March 31, 2021.
- Cash and cash equivalents of \$149.4 million as of March 31, 2021, in addition to other unencumbered assets of \$467.3 million.

First Quarter 2021 Results

"In the first quarter, Ellington Financial's Core Earnings and book value increased substantially, as we used our strong balance sheet to drive the growth of our high-yielding loan portfolios and opportunistically rotate capital allocations," said Laurence Penn, Chief Executive Officer and President. "During the quarter, we increased the combined size of our small balance commercial mortgage, residential transition, and consumer loan portfolios by a considerable 21%. We also took advantage of trading opportunities in securities, monetizing substantial gains in our CMBS and CLO portfolios. Finally, we capitalized on increased yield spread widening in the Agency RMBS market to add to our portfolio there, which increased our leverage incrementally. For the quarter, Core Earnings per share grew by 16% sequentially to \$0.43, and we generated an annualized economic return of 21.3%.

"During the first quarter, in addition to substantial gains in our CMBS and CLO portfolios, we also had notably strong performance from our non-QM loan business, where we successfully completed our first securitization of the new year, as well as from our consumer loan, residential transition loan, and non-Agency RMBS portfolios.

"With the growth of our loan portfolios and Core Earnings, we were well positioned for a substantial dividend increase. Last month, the Board increased our monthly dividend by 40% to \$0.14 per share, which was our third dividend increase in the last year. Given the earnings power of our current portfolio, including the significant contribution from our equity stakes in originators, along with additional dry powder to deploy, we remain confident that we can continue to grow the dividend from here.

"The year is off to a great start for Ellington Financial. As the economy continues to reopen but market volatility returns, our focus continues to be on the dual mandate of growing the portfolio and earnings, while staying disciplined on risk and liquidity management to preserve book value across market cycles."

² Excludes repo borrowings at certain unconsolidated entities that are recourse to us. Including such borrowings, the Company's debt-to-equity ratio based on total recourse borrowings was 2.0:1 as of March 31, 2021.

¹ Core Earnings is a non-GAAP financial measure. See "Reconciliation of Net Income (Loss) to Core Earnings" below for an explanation regarding the calculation of Core Earnings.

Financial Results

Despite the growth of the small balance commercial mortgage, residential transition, and consumer loan portfolios, the Company's total long credit portfolio³ actually decreased by 9% quarter over quarter, to \$1.299 billion as of March 31, 2021, as a result of opportunistic sales of CLOs, CMBS, and European RMBS, as well as the completion of a non-QM loan securitization in February.

Over the same period, the Company's total long Agency RMBS portfolio increased by 55% to \$1.488 billion, as yield spread widening in that sector presented attractive investment opportunities.

The Company's debt-to-equity ratio increased to 3.2:1 as of March 31, 2021, as compared to 2.6:1 as of December 31, 2020, adjusting for unsettled purchases and sales, driven primarily by increased borrowings related to the larger Agency RMBS portfolio. The Company's recourse debt-to-equity ratio, adjusted for unsettled purchases and sales, also increased over the course of the quarter to 2.0:1 from 1.6:1 at December 31, 2020.

During the first quarter, the Company's credit strategy generated total gross income of \$50.7 million, or \$1.14 per share, and its Agency strategy generated total gross income of \$40 thousand.

Higher net interest income⁴ quarter over quarter, along with substantial net realized and unrealized gains, drove the excellent performance of the credit portfolio in the first quarter. The increase in net interest income was primarily driven by larger small balance commercial mortgage, residential transition, non-QM, and consumer loan portfolios, as well as by lower financing costs, while the substantial realized and unrealized gains occurred mainly in the Company's CMBS, CLO, and non-QM strategies, as well as the Company's equity investments in mortgage originators. While the Company's UK nonconforming RMBS portfolio generated gains for the quarter, the Company's Euro-denominated RMBS portfolio generated losses for the quarter. Finally, the Company's credit hedges detracted from results, as credit yield spreads tightened during the quarter.

Meanwhile, the Company's Agency strategy was slightly positive for the quarter. During the quarter, long-term interest rates increased, actual and implied volatility rose, and the yield curve steepened. As a result, Agency RMBS durations extended and yield spreads widened, and most Agency RMBS prices declined sharply, particularly for lower coupon RMBS, which had the greatest declines. The increase in long-term interest rates also reduced the demand for prepayment protection, which caused the Company's prepayment-protected specified pools to further underperform. Meanwhile, the rise in long-term interest rates drove net gains on the Company's interest rate hedges and Agency interest-only securities, which along with net carry from the portfolio, more than offset the net losses on the Company's long Agency RMBS holdings.

The declining pay-ups on the Company's existing specified pool investments, together with the Company's focus on low pay-up specified pools for its additional purchases during the quarter, caused the average pay-ups on the Company's specified pools to decline to 1.02% as of March 31, 2021, from 2.05% as of December 31, 2020. Pav-ups are price premiums for specified pools relative to their TBA counterparts.

During the first quarter, the Company continued to hedge interest rate risk, primarily through the use of interest rate swaps, short positions in TBAs, U.S. Treasury securities, and futures. During the quarter, the Company substantially increased the size of its short TBA position, in conjunction with the increased size of its Agency RMBS portfolio. In addition, the Company continued to hold a portfolio of long TBAs for investment during the quarter.

³ Includes REO at the lower of cost or fair value. Excludes hedges and other derivative positions, as well as tranches of the Company's consolidated non-QM securitization trusts that were sold to third parties, but that are consolidated for U.S. GAAP reporting purposes. Including such tranches, the Company's total long credit portfolio was \$2.187 billion as of March 31, 2021. ⁴ Excludes any interest income and interest expense items from Interest rate hedges, net and Credit hedges and other activities, net.

Reconciliation of Net Income (Loss) to Core Earnings

The Company calculates Core Earnings as U.S. GAAP net income (loss) as adjusted for: (i) realized and unrealized gain (loss) on securities and loans, REO, financial derivatives (excluding periodic settlements on interest rate swaps), other secured borrowings, at fair value, and foreign currency transactions; (ii) incentive fee to affiliate; (iii) Catch-up Premium Amortization Adjustment (as defined below); (iv) non-cash equity compensation expense; (v) provision for income taxes; and (vi) certain other income or loss items that are of a non-recurring nature. For certain investments in unconsolidated entities, the Company includes the relevant components of net operating income in Core Earnings. The Catch-up Premium Amortization Adjustment is a quarterly adjustment to premium amortization triggered by changes in actual and projected prepayments on the Company's Agency RMBS (accompanied by a corresponding offsetting adjustment to realized and unrealized gains and losses). The adjustment is calculated as of the beginning of each quarter based on the Company's then-current assumptions about cashflows and prepayments, and can vary significantly from quarter to quarter.

Core Earnings is a supplemental non-GAAP financial measure. The Company believes that the presentation of Core Earnings provides a consistent measure of operating performance by excluding the impact of gains and losses and other adjustments listed above from operating results. The Company believes that Core Earnings provides information useful to investors because it is a metric that the Company uses to assess its performance and to evaluate the effective net yield provided by its portfolio. In addition, the Company believes that presenting Core Earnings enables its investors to measure, evaluate, and compare its operating performance to that of its peers. However, because Core Earnings is an incomplete measure of the Company's financial results and differs from net income (loss) computed in accordance with U.S. GAAP, it should be considered supplementary to, and not as a substitute for, net income (loss) computed in accordance with U.S. GAAP.

The following table reconciles, for the three-month periods ended March 31, 2021 and December 31, 2020, the Company's Core Earnings to the line on the Company's Consolidated Statement of Operations entitled Net Income (Loss), which the Company believes is the most directly comparable U.S. GAAP measure:
